

This is a travesty!!!

It is just a ploy for ?big business? to keep the strangle hold on competition and to keep milking the American public with 40 minutes of advertising and blah, blah, blah, sprinkled with repetitive, music industry directed music while filling their pockets.

Do not let this go any further! XM radio is the best thing that has happened in a long, long time, and I totally support the first admendment of free speach, like you should...
